• In Foundation we love learning about special maths vocabulary. It helps us to explain what we are learning about.

How many different words mean add?

• We finally made it to 100 days at school... Wooooo! Boy did we enjoy learning about place value to 100, how to make 100, what 100 looks like and even skip counting different ways to 100.

• Getting hands on is what we love best. Using hands on materials... and sometimes our bodies to explore math concepts.
